EXAMINER

GRAY, JILL M

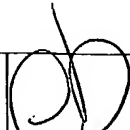

ART UNIT

PAPER NUMBER

1774

DATE MAILED: 08/11/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

<p align="center">Office Action Summary</p>	<p>Application No.</p> <p align="center">10/601,102</p>	<p>Applicant(s)</p> <p align="center">BALKUS ET AL.</p>	
	<p>Examiner</p> <p align="center">Jill M. Gray</p>	<p>Art Unit</p> <p align="center">1774</p>	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-34 is/are pending in the application.
- 4a) Of the above claim(s) 9-30 is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-8 and 31-34 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 11-35 been renumbered 9-34. ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 31-34, drawn to electrospun fibers, classified in class 428, subclass 364.
- II. Claims 9-30, drawn to a method, classified in class 264, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as electrostatically charging the solution.

Art Unit: 1774

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Lekha Gopalakrishnan on June 16, 2004 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-8 and 31-34. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under

Art Unit: 1774

the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-8, and 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al, 4,878,908 and 4,127,706 (Martin).

Martin teaches electrospun fiber and fiber network produced from a conducting solution comprising a precursor material and surfactant, per claims 1-3, 6-8 and 31-33. See '908, column 1, lines 13-15 and column 10, line 31; '206 column 1, lines 47-50 and column 3, lines 25-26. In addition, Martin teaches that the fibers have a diameter within applicants range as set forth in claim 5. See '908, column 3, lines 30-31; '706, column 1, lines 47-50.

Accordingly, the prior art teachings of Martin anticipate the invention as claimed in present claims 1-3, 5-8 and 31-33.

Claims 1-8 and 31-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al 4,043,331 (Martin).

Martin teaches electrospun fibers and network produced from a conducting solution, wherein said solution comprises a precursor material and surfactant, per claims 1-3, 6-8 and 31-33. See column 1, lines 13-15 and column 8, line 68. In addition, Martin teaches that the fiber diameter is within applicants' range as required by claim 5. See Example 3. Also, Martin teaches that a metal oxide of the type contemplated by applicants in claims 4 and 34 can be included. See column 8, lines 48-52.

Therefore, the teachings of Martin anticipate the invention as claimed in claims 1-8 and 31-34.

Art Unit: 1774

Claims 1-3, 5-8 and 31-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Simpson et al, US2004/0037813 A1 (Simpson) or Layman et al, US 2003/0215624 A1 (Layman).

Simpson and Layman each teach electrospun fibers produced from a conducting solution comprising a precursor material and surfactant, per claims 1-3, 6-8, and 31-33. See Simpson, page 6, [0079] and Layman, abstract and page 4, [0043]. As to the diameter set forth in claim 5, Simpson and Layman each teach diameters within applicants' claimed range. See Simpson, claim 10 and Layman, page 1, [0003].

Therefore, the prior art references of Simpson and Layman anticipate the invention of claims 1-3, 6-8, and 31-33.

No claims are allowed.

Conclusion

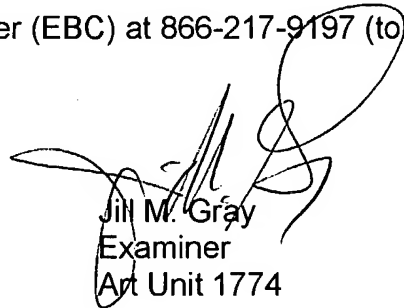

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill M. Gray whose telephone number is 571-272-1524. The examiner can normally be reached on M-F 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
